

## Reason Statement for Selection

○ Title: Open Design Competition for the Jeonnam Citizen's Square

○ Name: Laurent SALOMON

(Signature)

RANK	ENTRIES NUMBER	Detail
1 <sup>st</sup> Winner	51	Project of high architectural level, with very sensitive expression and artistic references. Good relations with the Central Parc and great dignity of position and uses facing the Government Building
2 <sup>nd</sup> Winner	108	Project of which aims treat an architectural and urban intervention by means of a piece of art honoring solar energy. As a result, the urban use at the foot of the work remains enigmatic
3 <sup>rd</sup> Winner	45	The simplicity of the proposed solution makes possible both to highlight the Government Building by a planted setback, and to reach Central Parc by a light footbridge, but the project does not present a specific character commensurate with the symbolic urban challenge.
3 <sup>rd</sup> Winner	97	The idea of an urban farm on the edge of a park facing the Government Building. Is exciting, but the architectural choice of a linear construction separating the institutional building from the city is irrelevant. In addition, the continuity with Central Parc is materialized by an artificial ground out of scale.
